Aufgabe 3: More Java-Generics

Java-Programmierungsaufgabe

Aufgabe 4: Übungslösungsalgorithmus

Download exercise sheet from ILIAS;
Before the team meeting every team member try to solve questions in the exercise sheet
 independently;
foreach *question $q_i \in$ exercise sheet Q* **do**
    if *everyone has an idea to solve q_i* **then**
        discuss ideas;
        check correctness;
    else if *Not all team member has an idea to solve q_i* **then**
        anyone who has an idea shares his idea with other team member;
        check correctness;
    else
        discuss the questions together;
        if *there is some ideas* **then**
            check correctness;
        else
            turn to tutor or fellow student;
        end
    end
end
edit the solution together via online document;
attend the tutorium;

Algorithm 1: How to solve the exercise sheet of DSA
